PROFESSIONAL SUMMARY

Senior QA & Automation Engineer with 3+ years of experience in software testing, specializing in manual and automated testing for web and mobile applications. Skilled in Selenium, API testing, and CI/CD, with a strong focus on improving test coverage and product quality. Collaborative team player with experience mentoring junior engineers and working closely with cross-functional teams. Bringing a user-focused mindset from a frontend background, with a continuous drive to learn and improve testing processes.

WORK EXPERIENCE

Senior QA&Automation Engineer

Apr 2025– Present

Vodafone Egypt

- Leading QA activities across multiple squads, ensuring alignment with quality standards.
- Designing and executing comprehensive test cases for web and mobile applications.
- Mentoring junior QA engineers and conducting code reviews to improve automation quality.
- Building and maintaining automation frameworks using Selenium, Java, and TestNG.
- Supporting CI/CD pipelines using Jenkins and ensuring test feedback integration.
- Collaborating with development, DevOps, product, and UX/UI teams.
- Managing defect lifecycle using Jira with detailed reporting and analysis.
- Participating in sprint planning, design discussions, and retrospectives.
- Early adopter of GitHub Copilot Enterprise to research, evaluate its business impact, and provide insights, while guiding team members on setup and effective usage.

QA&Automation Engineer

Feb 2024 – Apr 2025

Vodafone Egypt

- Designed and executed manual and automated test cases.
- Automated test scenarios using Selenium with Java.
